Letter from the President SIPMU Dr. Maria Paola Brugnoli

SIPMU: THE WAY TO AN INNER SEARCH PERSONAL AND COLLECTIVE

Dear Friends and Colleagues who together have decided to walk with us down the road of hypnosis in psychotherapy and humanistic medicine and psychology, first of all a warm welcome greeting to all.

We have a lot of study projects, in continuity with those just passed, for these next 3 years 2023-2025. In this newsletter, I will introduce SIPMU with its 2023-2025 board, with all its committees, coordinators and its Italian sections, and I will also introduce our Italian and foreign honorary members with whom we are deepening and will deepen many interesting researches. We will illustrate all our projects, the projects of a team that with a lot of enthusiasm wants to grow and build for young people, who are our wonderful future.

Letter from the President SIPMU Dr. Maria Paola Brugnoli

Through clinical hypnosis and humanistic medicine, the inner and collective search are an invitation, so that each person can progress first on his or her own individual path, on a path in the tangled forest of life, a forest that can be wonderful and full of surprises.

And on that path in the forest of life "wild and rugged and strong," on that path at first barely hinted at, on that path equal but different for everyone, I invite everyone to direct and conscious action, to personal discovery, to visitation and revisiting of one's inner self, both within the inner world and toward the collective world of our scientific and intellectual growth. Underlying it all is all of us together, human beings, with all the countless facets related to the fact that each being is unique and unrepeatable. And in this journey of inner knowledge both individually and collectively, we can find the joy of heart and life.

2023

Letter from the President SIPMU DR. Maria Paola Brugnoli

Joy in the heart makes us see all things with love,
And with that detachment necessary to never let ourselves be
conditioned by the ephemeral,
by everything that does not serve to bring our consciousness up
high, by everything that distances us from personal and collective
evolution, the evolution of body, mind, soul, spirit.

Every moment of life lived with joy in the heart thus becomes a
moment of great well-being and of great sharing with one's
neighbor, with the other.

The personal vision expands, until it becomes a collective shared
vision and universal, until it loses its defined contours, to become
diluted within our infinite individual and social consciousness.

This is my wish for all of us on our journey together.

Thank you all for your valuable collaboration

Maria Paola Brugnoli

2023

From the beginning of time, the sky was harmonious
And the colors possessed the earth In a great embrace of love.
Sitting at the edge of the sky
We watch together the symphony of colors, and the harmony of the clouds

Embraced by the dying sun.
A spectacle that becomes real In every magical moment
Of the minute droplets in suspension In the air rich with silence, of creativity and imagination.

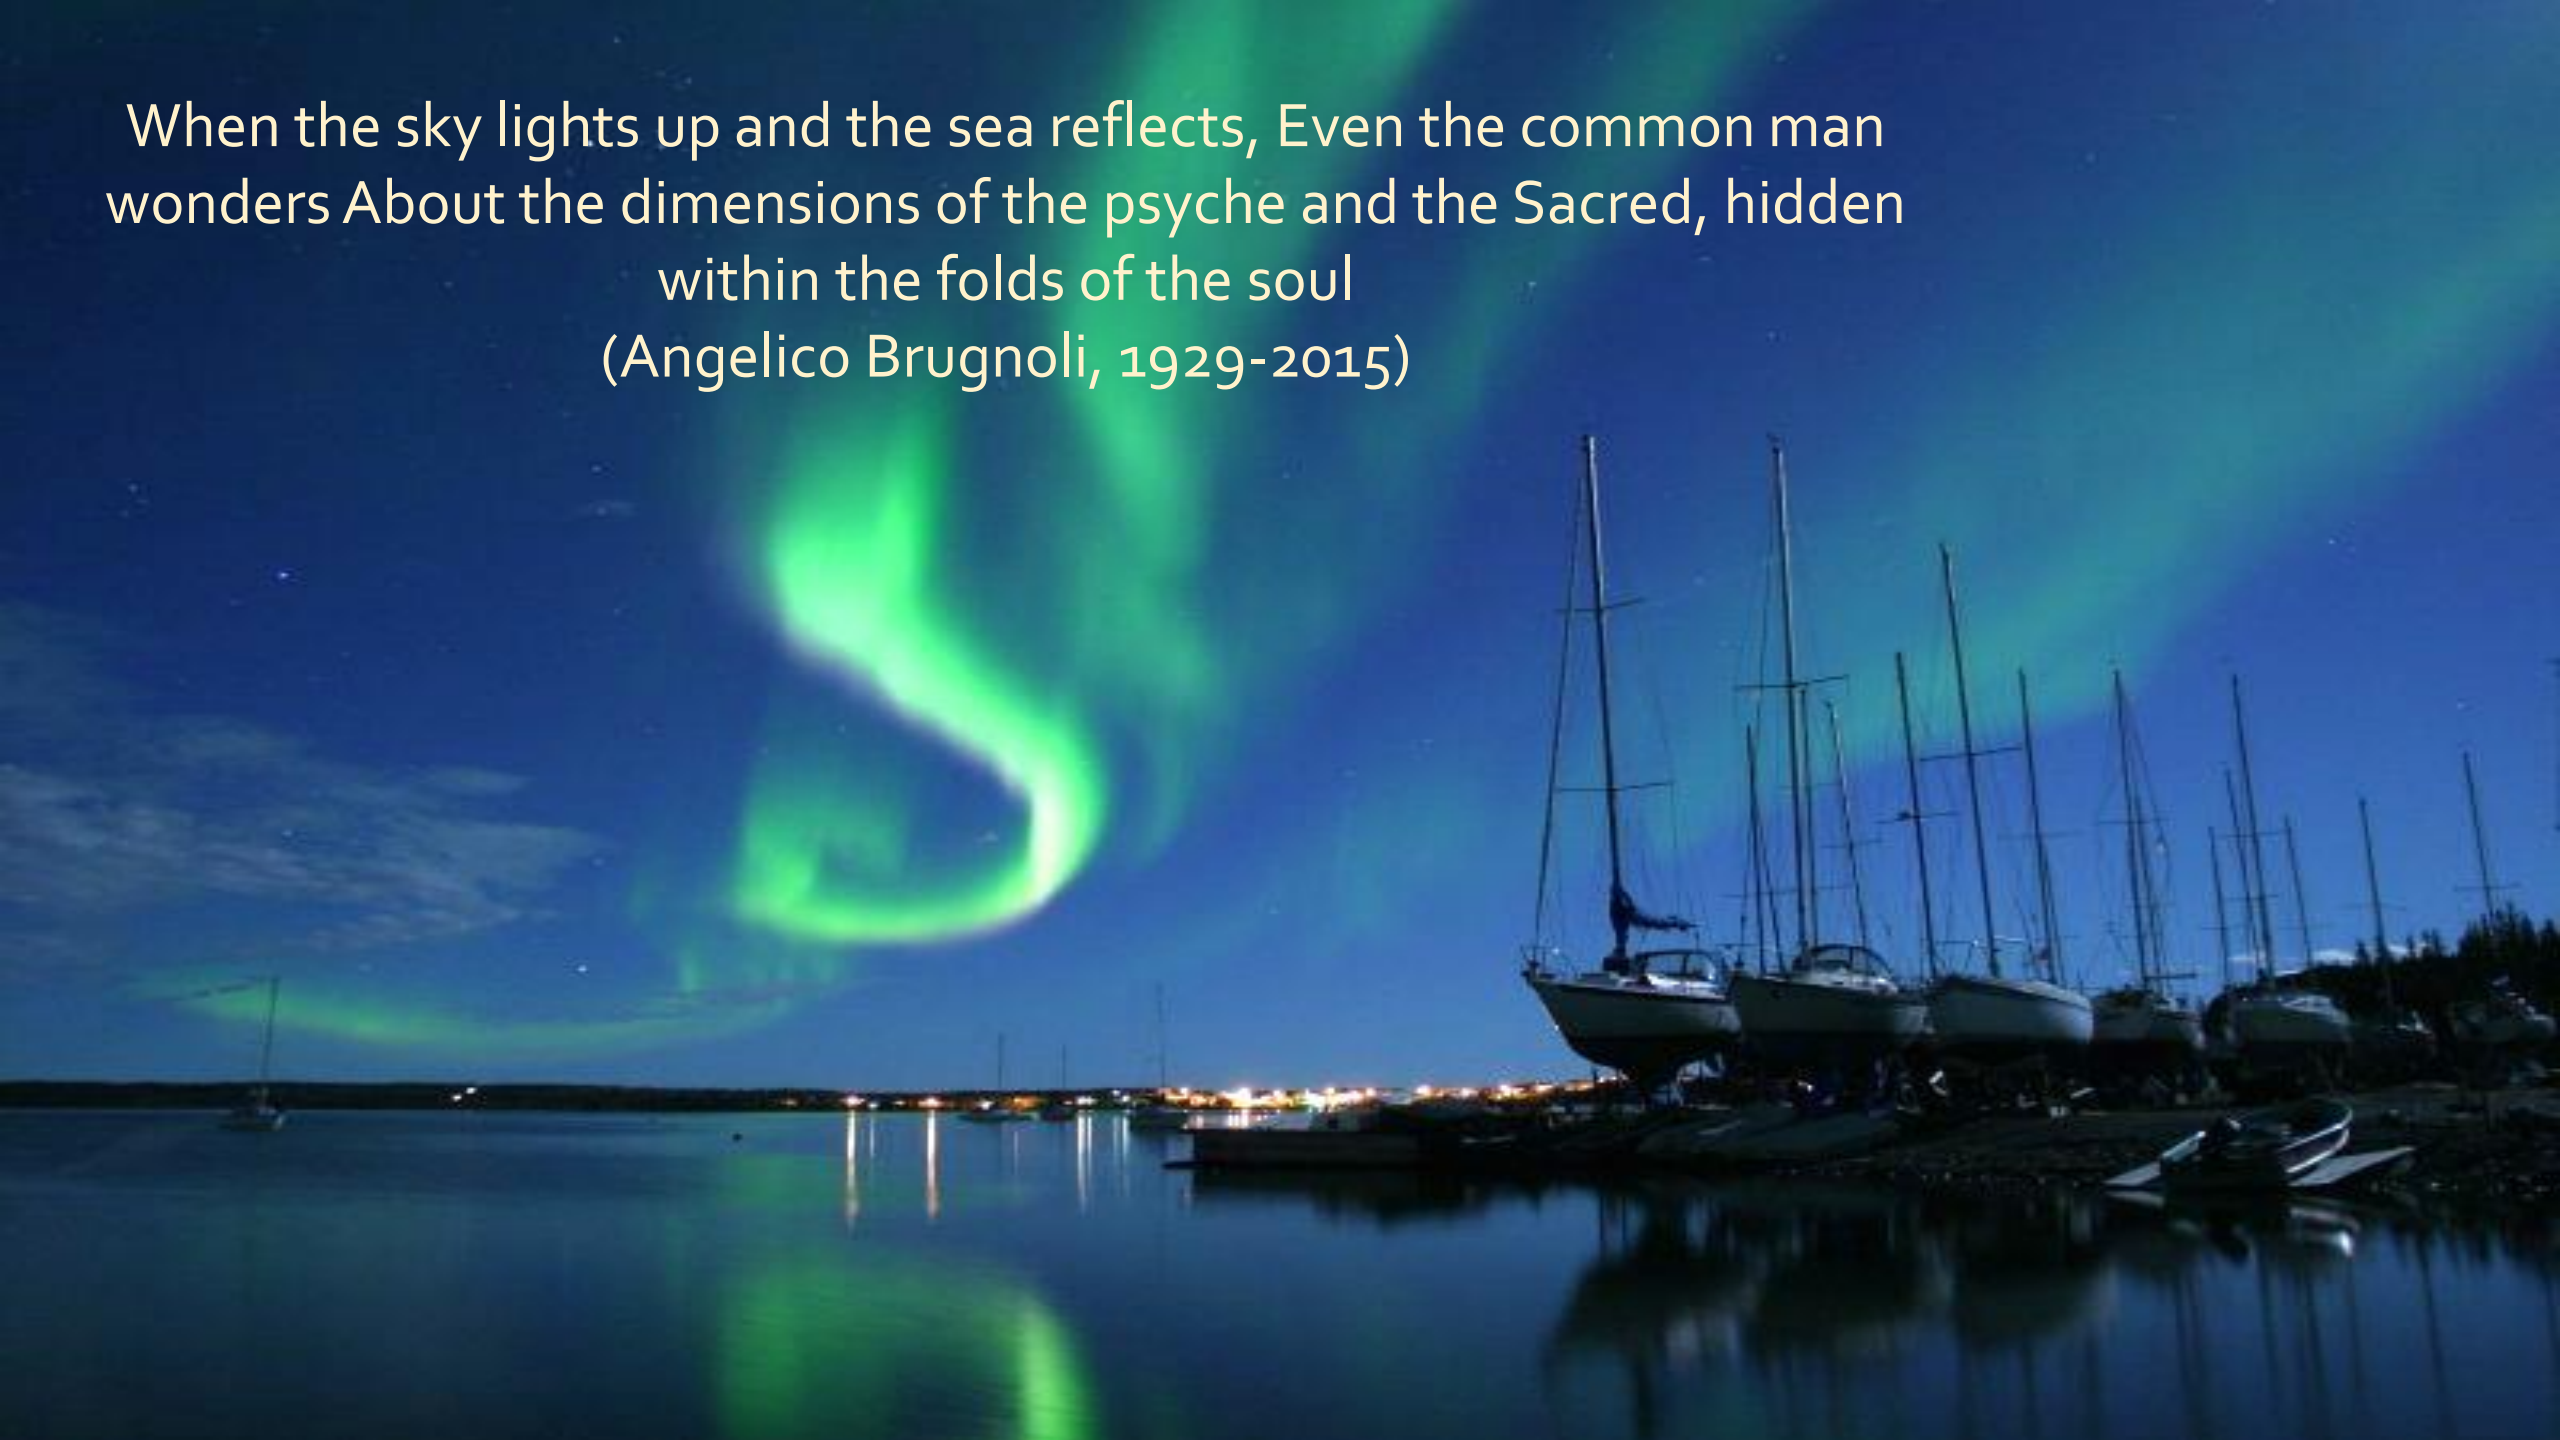

Where the embrace with the cosmos Is virtual and real at the same time, where breath becomes life, where knowledge becomes reality, where awareness opens new paths every day.

(Angelico Brugnoli, MD, 2013)

When the sky lights up and the sea reflects,
Even the common man
wonders About the dimensions of the psyche and the Sacred, hidden
within the folds of the soul
(Angelico Brugnoli, 1929-2015)

Approval of the new BOARD OF DIRECTORS SIPMU 2023-2025

- The following serve on the SIPMU Board of Directors:
- the president,
- vice-president,
- treasurer,
- organizational secretary,
- director and deputy director of the scientific committee, and
- director of the ethics committee.
- Having an enlarged Board of Directors leads us to promote many new ideas for greater development in both teaching and research.

"Chronic pain and human suffering in all their varieties, when they present themselves meaningless and purposeless, as unfortunately happens far more often than one would think, they wear down the body, and wound the soul but, in particular moments that are dense with pregnant meaning, they elevate the spirit to normally unknown realities."

Angelico Brugnoli, MD (Verona 1929-2015)

Letter from the Editor Dr. Maria Paola Brugnoli

For a year now, Europe has been living in a time of war.

Never would I have imagined a few months ago to write such a serious letter. Writing a newsletter today, even with scientific content, should not make us forget that our Ukrainian brothers and sisters, are under bombing and dying. It is difficult for us doctors, psychologists and people of science, to figure out how to help them, but I think even just letting them know that we are always there for all of them, is important.

Ukraine has been granted EU candidate status. European Union leaders decided to grant Ukraine and Moldova EU candidate status. "This is a historic moment," said European Council President Charles Michel. "Today marks a crucial step on your path to the EU," he added, congratulating Ukrainian President Volodymyr Zelenskyy and Moldovan President Maia Sandu, as well as the citizens of Ukraine and Moldova.

Letter from the Editor Dr. Maria Paola Brugnoli

European Commission President Ursula von der Leyen said: "At this meeting of the European Council we witnessed the birth of history: The first steps of Ukraine, Moldova and Georgia on the road to our European family. The European Commission will be at your side on this journey." (Ursula von der Leyen)

For this reason, in order to join in helping our Ukrainian brothers and sisters also through science, we invited Prof. Borys Ivnyev, Psychiatrist Physician, Rector of the Faculty of Medicine in Kiev, and member of ISH International Society of Hypnosis and ESH European Society of Hypnosis, to become an Honorary Member of SIPMU. We are very honored and happy that he accepted. In addition, SIPMU with Dr. Maria Paola Brugnoli and Prof. Borys Ivnyev, have started in September 2022, which will last until May 2023, a basic hypnosis course in English language, free of charge of 50, hours for medical and psychologist colleagues from KMU Kiev Medical University, who have joined, and with whom we hope to always continue our scientific collaboration, wishing for peace soon.

Kyiv Medical University, KMU:

In 2022 and will continue in 2023, Dr. Maria Paola Brugnoli has started an active online collaboration, with The Kyiv Medical University, KMU to help free training of Ukrainian physicians and psychologists, in this severe time of war. In collaboration with Professor Borys Iynev, medical Psychiatrist and Hypnotherapist, Rector of KMU Kyiv Medical University and Vice-President of the UAPP Ukrainian Association of Psychotherapists and Psychoanalysts (Head of Department of Hypnotherapy) a constituent society of ESH, they have initiated in cooperation with SIPMU, in the person of Dr. Brugnoli, a 50-hour, one-year, free basic course in English for Ukrainian medical and psychologist colleagues. This course not only meets the criteria of our SIPMU goal of humanistic medicine and training both domestically and internationally, but is very important from a humanitarian point of view to support Ukrainian colleagues in war. SIPMU, once the war is over, and hopefully soon, will continue its collaboration with The Medical University of Kiev. The course has been recognized by the ESH president and board and Ukrainian colleagues, at the end of the course will have an internationally recognized hypnosis diploma issued by SIPMU, in collaboration with KMU, UAPP and ESH. SIPMU is very happy and honored to continue the active collaboration with KMU even at the end of the course

SIPMU and humanistic psychology

Nature, too, in many of its manifestations,
even the least followed and observed,
offers you the heart of the new man,
his great heart,
born of millennia of continuous evolution.
It is necessary to recognize it,
to accompany it in time,
follow it, desire it and love it.
The new man is not a being who appears,
but a being with a big heart,
of great patience, availability,
Inwardness and
of great understanding of his fellow man.
He knows that he does not know.
(Angelico Brugnoli, 2014)

SIPMU PROJECTS TRIENNIUM 2023-2025

SIPMU

*Società Scientifica Italiana Ipnosi Clinica
in Psicoterapia e Medicina Umanistica*

n. 3

February

2023

All SIPMU section coordinators are invited to create socials of their SIPMU section, as they like: linkedin, facebook, youtube, instagram, researchgate, academia or others, where they can post their possible scientific papers and books, scientific journal, and newsletter of SIPMU, so as to give it the highest visibility. If we want to grow to teach hypnosis in accordance with international ethical standards, we need to make ourselves known.

Coordinators are also invited to organize meetings and/or trainings in both hypnosis and humanistic medicine and psychology at local venues.

The board and the organizing secretary, upon request of the coordinators, will help organize the meetings. With its training project, SIPMU wants to promote clinical hypnosis and the study of humanistic medicine and psychology based on the highest scientific criteria. Online and in-person meetings with all members, the board, coordinators and committees will be promoted by the board so as to increase members' personal knowledge and mutual cooperation.

2023

Meetings possibly in presence will be promoted by the board, also to develop studies not only of clinical hypnosis, but also of humanistic medicine, in collaboration with other scholars both national and international, who are already among the honorary members, or who will be proposed by the members; it is hoped that these meetings may also be in collaboration with other scientific societies and universities in the national and international territory. All SIPMU members are warmly invited to collaborate as speakers in educational training projects as far as their expertise is concerned. The scientific committee, the ethics committee and the organizing secretariat will be invited to collaborate in the planning and organization of training events within their competence. The organizing secretariat will keep all members informed by email, of SIPMU news and events, including in the different regional offices, and will promote SIPMU events and publications on social media; it will also help the board in organizing training events. Initiatives will be promoted with other scientific societies and universities, of collaboration in psychology, medicine and humanities. Short feedback questionnaires will be sent to members, to promote new ideas and initiatives. Both online and in-person meetings will be convened

EDUCATIONAL/TRAINING PROJECTS 2023-2025:

these projects may be proposed by the president, board, committees, section coordinators and all members, and approved by the board; projects organized by the board are in collaboration with the scientific committee and the organizing secretariat, which will consist of a team of several people for:

Organizing courses/symposia of one or more days, of clinical hypnosis, including in-depth single-topic, CME-accredited for physicians and psychologists, so as to promote hypnosis and the work of SIPMU in the different regions of Italy. Organization of one-day courses or symposia on humanistic medicine and psychology, with CME, open to all health professions, so as to promote humanistic medicine and psychology and the work of SIPMU in the different regions of Italy.

Section coordinators are welcome to propose to the board and organize these courses and symposia in their regions.

And finally, notes from President Maria Paola Brugnoli, thanking everyone:

- **When it comes to teamwork, there is nothing more effective than collaboration.**
- **After all: teamwork makes dreams come true.**
- **There are those who want something to happen, those who want it to happen, and those who work to make it happen: let us all grow together, collaborating in SIPMU. Have the courage to follow your heart and intuition with new proposals. Somehow, your heart and intuition already know how we can grow together, through science and humanistic medicine and psychology.**
- **Thank you!**

Bioethics and Consciousness vol.1

by Alberto Garcia Gomez, Maria Paola Brugnoli, Alberto Carrara, Giorgia Salatiello,
Joachim Keppler

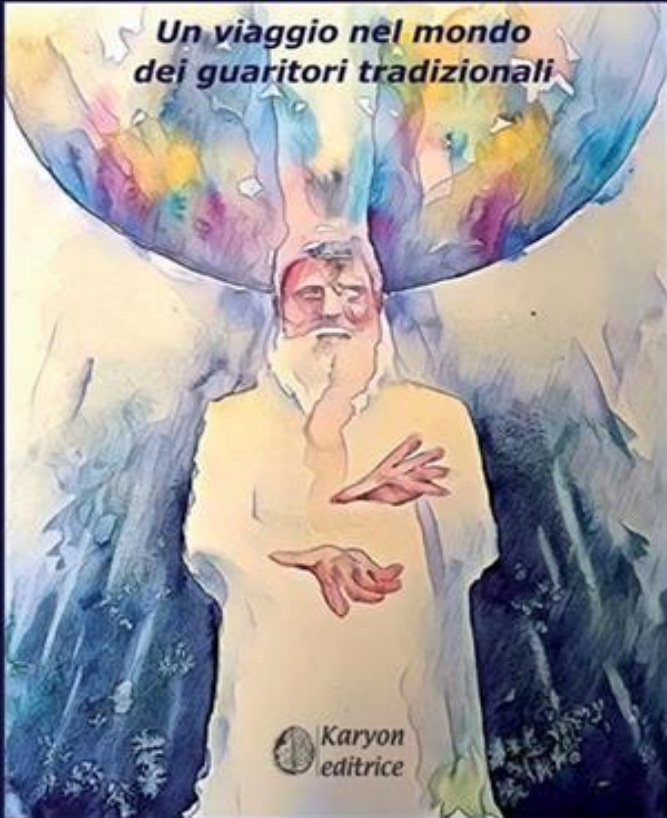

The study of consciousness and its psychological and neuroscientific correlates is of great importance to all scientists and clinicians today. However, only a multidisciplinary study can help us understand the ultimate reality of consciousness. This book not only reviews the neuroscientific and psychological foundations and phenomena of consciousness, awareness, self-awareness and neurobioethics, but also provides a new interdisciplinary model of current scientific studies and definitions of consciousness. As such, it offers a multidisciplinary bridge between brain, mind, philosophy, introspective self-awareness, human identity and free will.

Terapie ancestrali, di Alessandro Norsa (Italian)

TERAPIE ANCESTRALI

A cura di Alessandro Norsa

*Un viaggio nel mondo
dei guaritori tradizionali*

TERAPIE ANCESTRALI: VIAGGIO NEL MONDO DEI GUARITORI TRADIZIONALI

- Venti ricercatori di diversa provenienza culturale e geografica investigano direttamente sul campo sulle tradizioni di guarigione ancestrale coinvolgendo i locali medicine men.
- Uno studio appassionante e ricco di dettagli risultato di una ricerca coordinata da Alessandro Norsa e realizzata da una decina di ricercatori universitari antropologi di lingua e cultura indigena (tra cui Bangladesh, Perù, Messico, Paesi islamici, Spagna, Cuba e Georgia) ed arricchita da differenti punti di osservazione quali il figlio di un guaritore africano, uno sciamano nepalese, una guaritrice sarda, un adepto brasiliano di tradizione umbanda, un medico messicano, una mediatrice culturale e una turista italiana ma anche migranti nigeriani e lituani.
- Tanti approcci diversi che si intersecano e si arricchiscono vicendevolmente portando alla luce quelle tradizioni di cura ancestrale sulla via dell'oblio, svelandone ricchezze e segreti ignoti fino ad ora alla cultura occidentale.

Maschere divine, di Alessandro Norsa (Italian)

MASCHERE DIVINE

STORIA DEI RITI DI
PASSAGGIO INVERNALI

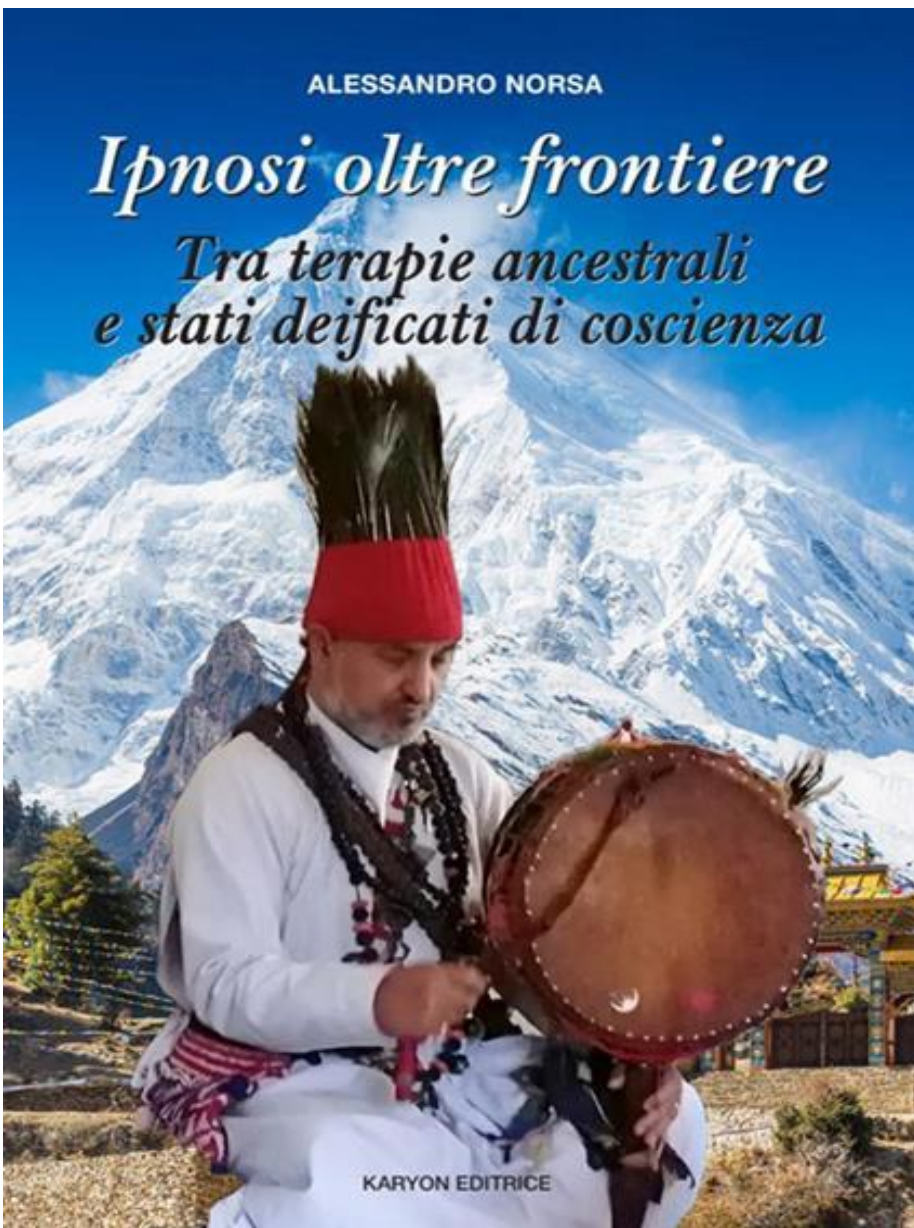

A CURA DI ALESSANDRO NORSA

Maschere divine.

- Dietro le maschere tradizionali si nasconde il lungo viaggio dei riti, un ininterrotto rapporto del contatto con le divinità protettrici invocate per garantire la sussistenza della comunità.
- Le prime tracce della produzione della maschera portano da un pensiero magico-simbolico in cui rappresentativi volti stilizzati divenivano un utile tramite con un ricco mondo spirituale. In queste pagine si offre al lettore una chiave interpretativa per accedere alla conoscenza delle maschere ancestrali ed il loro rapporto tra divinità, spiriti e gli antichissimi riti esorcistici o propiziatori:
- evocazioni di un anelito di fede e speranza che, a partire dagli albori dell'umanità, si è protratto fino ai nostri giorni.

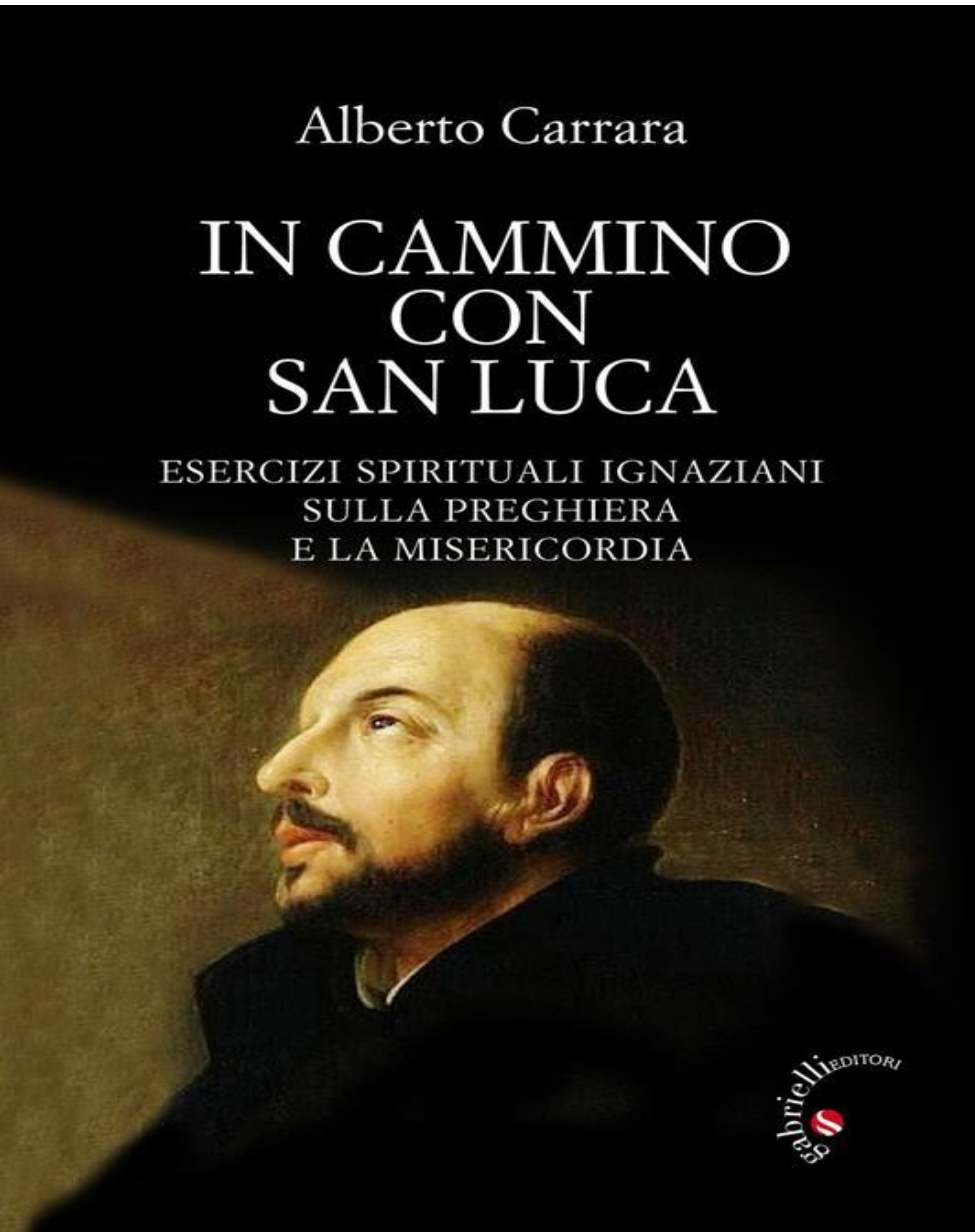

Ipnosi oltre frontiere, di Alessandro Norsa (Italian)

IPNOSI OLTRE FRONTIERE: TRA TERAPIE ANCESTRALI E STATI DEIFICATI DI COSCIENZA

- L'uso dell'ipnosi per il trattamento dei problemi e delle sofferenze umane è probabilmente antico quanto la storia dei tentativi dell'uomo di curare i sofferenti. Sebbene con forme e nomi diversi, l'ipnosi era nota anche nelle più antiche popolazioni primitive, che la usavano a scopo non soltanto terapeutico ma anche divinatorio: i fenomeni dell'ipnosi erano letti come dono o potenza del divino e applicati alle situazioni più disparate tramite il profeta, o lo sciamano, o il medico o il sacerdote.
- Come già sottolineato da Katalin Varga Direttore del Dipartimento di Psicologia della Eötvös Loránd University di Budapest al Convegno Hypnosis New Generation del 2019, le ricerche avviate da Alessandro Norsa in ambito ipnologico su questa tematica "hanno aperto un nuovo filone di ricerca".
- Il presente volume è una innovativa indagine di studio di questi metodi che, partendo dalle origini della cultura occidentale, si estende alle altre aree del mondo in cui ancora oggi sono praticati conservando tutta il fascino e la potenza della cultura delle origini.
